Sir John Cockcroft, C.B.E., F.R.S.,
Atomic Energy Research Establishment,
Harwell, Didcot,
Bucks, England.

Our File: Heavy Water.

Dear Sir:

We are shipping under separate cover thirty-two and one half (32.5) pounds of heavy water. This water has an isotopic content of 94.5 mol % D and the conductivity is 1.5×10^{-5} mhos. This material underwent a simple distillation prior to shipment.

It is requested that the stainless steel drum used in this shipment be returned at your earliest convenience to this project to the attention of the writer.

It is also requested that carbon copy of this letter be initialed by you upon receipt of this shipment and the copy returned to this project for completion of our records.

Yours very truly,

J. A. Morrison
